CANDIDATE TAFT SEES MISSIONARY

He Discusses Work in China with Rev. C. W. Painter.

SITUATION GROWING SERIOUS

Clergyman Just from the Far East Tells of Grievous Wrongs Imposed by the Powers Seeking a Partition-Vorys Quits Hot Springs and Goes to Detroit, Mich.

Hot Springs, Va., Aug. 24-Mr. Taft spoke with appreciation to-day of the work of the Christian missionaries in China, and gave it as his opinion that they could do more than any other class of men to promote good feeling between that nation and the United States.

A conference with Rev. C. W. Painter, who for thirty-five years has been a nissionary of the Presbyterian Church at Hangchow, China, brought this expression from the candidate.

Mr. Painter called on Mr. Taft to urge him to do everything possible in the event of his ever having the power to promote justice and good feeling between the two countries. As Mr. Painter sees it, the situation in

China is serious. The people of that country are waking up to the fact that the only question which is agitating the powers is what to do with China, and not what to do for her.

The wrongs imposed by the powers that are walting to partition the empire have, so the missionary declared, aroused the people to resentment and anger, and the result may be that China, when really stirred up, will endeavor not only to recover her lost rights, but to revenge herself on her aggressors. It was in this connection that Mr. Painter recognizes chiefly the so-called vellow peril.

and treat the Chinese with kindness and

Mr. Painter was of the opinion that the present indications pointed to the fact that the United States is acquiescing in Japan's possession of Korea and her domination of Manchuria merely for the purpose of keeping a bone of contention between China and Japan and preventing a union between the two, which would bring a real yellow peril into being.

It was on the point of restricting the growth of China as an independent power that Mr. Taft spoke most emphatically. He said: "We ought to welcome China's growth as an independent power. We ught not to be jealous about it, for it is the blindest kind of a policy to retard the development of a nation in the hope of thus increasing our trade.
